

Daniel Marie

Qualifications

- Bachelor of Electrical Engineering (University of Sydney)
- AIPM Certified Practicing Project Manager (CPPM)
- Certified Scrum Master
- Defence Clearance – Negative Vetting Level 1 (CS ID: 71880)
- Rail Industry Worker Card (RIW#20-00134048)
- WHS General Construction Induction Card (White Card #CGI1496859SEQ01)

About Daniel...

An experienced project manager, Daniel specialises in the management of highly technical projects. Able to remain clearheaded and confident in fast-paced environments. Daniel also possesses exceptional leadership, organisational skills and clear thinking, that allow him to meet tight deadlines and maintain a “no surprises” approach to project delivery.

With expertise in project planning, documentation, systems engineering and risk management, Daniel operates at all project management levels; from developing strategic direction to the resolution of technical complexities.

With expertise in “as-is” and “to-be” process analysis, process re-engineering, BPMN notations, Plain English writing and technical illustrations, Daniel can design and develop excellent documentation that is complete, efficient and accurate.

Daniel commenced his career as an Electrical Engineer and then moved into technical documentation and project management. Daniel has worked in many organisations including Ausgrid, RailCorp, Sydney Trains, Queensland Rail, Transport for NSW (TfNSW), Roads & Maritime Services, WorkCover, Sydney Water, IBM GSA, Westpac, Commonwealth Bank and Defence.

Key Skills

- Project Management - CPPM
- Systems Engineering
- Asset Management
- Reliability Engineering
- Stakeholder Management
- Risk Analysis and Management
- Design Management
- Business Analysis
- Technical Writing
- Document and Information Management
- Change and Configuration Management
- Software Development
- Testing, verification, and commissioning
- Cost and Contingency Management
- Power BI Dashboards.

Key Achievements

- **Sydney Ferry Wharf Upgrades** – managed design and delivery of a \$250M program across 24 sites in Sydney Harbour
- **Commonwealth Bank Public Cloud** – delivered a pilot program to prove migration of banking systems to cloud platforms
- **Sydney Trains Power Supply Upgrades** – provided project controls to manage risks, costs and schedule of 40 substation upgrades
- **Outer Suburban Rail Car** – delivered UGLR passenger trains to RailCorp and commissioned them into service
- **Sydney Olympics 2000** – implemented the results system for 2 sports, delivering real-time data to global audiences
- **Collins Class Submarines** – delivered Sonar System operation and maintenance manuals
- **Australian Hearing** – development and roll-out of a web-based business-system to interface with their Oracle accounting system
- **Sydney Water** – delivered the Warragamba Dam Operations and Maintenance Manuals and 25 Dam Safety Emergency Plans.

Work Experience – last 10 years

Senior Process Analyst

Ausgrid

Feb 2023 – Jun 2024

- Assessed the maturity, currency and completeness of existing process documentation
- Developed a process framework for the Asset Investment and Planning Group
- Delivered an organised repository of processes and procedures in SharePoint
- Managed the release of tools for planners (DevOps, Python, VB, .NET)
- Developed requirements for next generation of planning tools and processes
- Developed a Strategic Roadmap for the development and implementation of planning tools over the next 3 years.

Senior Technical Writer Inmarsat

May 2023 – Oct 2023

- Analysis of maintenance and installation procedures to identify OH&S risks and provide mitigations to satisfy defence CASG requirements
- Delivered the Safety Case Report for Inmarsat Satellite Communications equipment installed on Australian Navy vessels
- Required Defence Clearance
- Final Safety Case approved by Defence.

Senior Technical Writer Bellinger Systems

Jan 2023 – Apr 2023

- High Frequency Radio Communications System (Link-22) with sites around Australia
- Developed System Specifications, Design Documents and Maintenance and Operations Manuals
- Developed documentation to Defence standards
- Developed company templates for all their defence documentation.

Senior Project Manager TfNSW Ferry Wharf Upgrade Program (\$250m)

Oct 2014 – Oct 2022

- Managed the design and delivery of 24 wharf upgrades around Sydney Harbour for TfNSW
- Client-side project manager - monitored progress, facilitated resolution of issues and provided regular reports to TfNSW, the sponsor
- Steered projects through the INSW Gateway process and met all TfNSW Governance requirements
- Experience in DDA-compliant designs for public transport and Wayfinding
- Maritime infrastructure construction with 50 year life - climate-change resilient designs for maritime conditions
- Cost and contingency management to TfNSW standards – including cost-loaded schedules in P6 Primavera.

IT Program Manager Commonwealth Bank – Public Cloud Program

Apr 2017 – Oct 2017

- Managed the design and delivery of CBA apps in the Public Cloud (Azure and Amazon)
- An initiative to deliver the power and agility of cloud computing to CBA IT in a controlled and safe environment
- Key challenges included establishing trust in the cloud platforms with CBA IT Security and demonstrating to APRA that the necessary controls were in place and effective
- Agile project management methodology
- Used Jira and daily Scrums to manage the work and Confluence for the project documentation.

Process Analyst Queensland Rail (\$6m)

Oct 2015 – Apr 2016

- Implemented new rostering system for drivers and guards in Queensland Rail using software called HASTUS from Giro, Canada
- Developed the roadmap for process development and delivery
- Delivered the “as-is” process documents and facilitated workshops to obtain approval of “to-be” processes from the train crews and from management
- Identified the impacts on staff and developed the change management plan for Queensland Rail to minimise disruptions during changeover.

Project Controls Manager TfNSW, Power Supply Upgrade Program

Aug 2013 – Dec 2014

- Transitioned from RailCorp to TfNSW project management processes and tools.
- Monitored and governed all project management processes
- Developed and managed the document and drawings transmittal process; and developed training material
- Trained and supported the 70+ PSU staff in the effective use of the new TfNSW IT systems such as DeskSite, TeamBinder, Scenario, Cura, INX, MS Access, MS Excel, MS Word and Visio
- Specified and managed the development of a project information management database to provide program level dashboards, visibility of key project metrics and automate production of all monthly reports.
